

**FIXED**

# STARLINK

## HIGH PERFORMANCE

Starlink offers reliable high-speed network coverage of up to 220 Mbps and is powered by the largest network of LEO satellites in the world. Starlink offers high-data-use activities like business apps, streaming, and video calls without sacrificing its high-speed functionality and is suitable for any disruptive environmental situations.

LEO satellite connectivity

High-speed connectivity

Low-latency technology

Fixed and portable usage

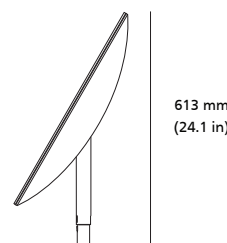

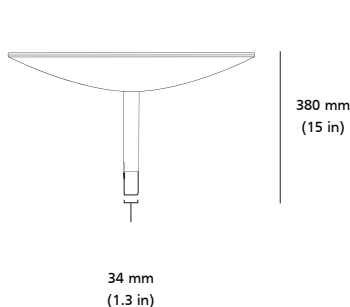

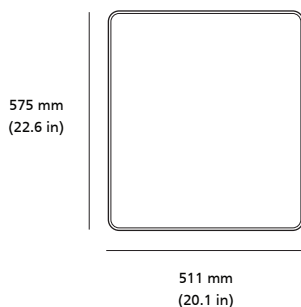

Motorised & Self-orienting

Simple installation

Best for power user, business, and enterprise applications. With a higher gain antenna, additional throughput allocation, and better extreme weather performance, businesses can ensure bandwidth for critical operations 24/7.
