## Data Flex Plans

This data pooling plan simplifies data consolidation and sharing, enhancing collaboration and resource utilization. Unlock your data's full potential with flexible options tailored to your needs.

	DATAFLEX PACKAGE
Total Pooled Priority Access Data	100 TB
Package Term	12 Months
Starlink Data Access & 24/7 Advanced Support	Up to 50 Starlink Kits Included

Package only includes Starlink pooled data and 24/7 Advanced Support. Starlink Kit sold separately. Equipment installation, additional services and ancillary equipment available at additional rates. Packages subject to availability.

## Impact Data Plans

Introducing the Starlink Impact Plan, designed specifically for eligible anchor institutions such as public schools, tax-funded health clinics, hospitals, public libraries, and community centers. This plan ensures that public entities funded by taxpayer or donated dollars can access the data solutions they need to thrive and serve their communities effectively.

- To qualify, the end customer must:
  - Be a public entity funded by taxpayer or donated dollars.
  - Use the service for primary connectivity (not for backhaul or ancillary infrastructure).
  - Be a new activation or a contract up for renewal.
  - If purchased on behalf of a group, the purchasing entity must also be publicly funded.

Plan Term	Priority Data	Plan Type	24/7 Support	Starlink Kit
12 Months	2 TB	Fixed	Included	Not Included
36 Months	2 TB	Fixed	Included	Enterprise Kit included at no additional cost

This offer applies to new activations only. Transfers of existing accounts may be permitted, subject to prior approval from Starlink.

For pricing, contact your sales person or dial +1-833-637-7827 or 83-Enerstar

# NEW ENERSTARLINK DATA PLANS

# EnerStarlink AutoBoost

Stay connected without interruptions, even after exhausting your priority data allowance, with EnerStar's Auto Boost feature. This convenient option ensures your kit automatically upgrades to the next tiered plan for the rest of the month, maintaining your high-speed connectivity without any manual adjustments.

## Why Choose AutoBoost?

- Peace of Mind
- Flexibility and Control
- Cost-Effective Solution
- Reliability When It Matters

## How it Works?

For pricing, contact your sales person or dial +1-833-637-7827 or 83-Enerstar

## DID YOU KNOW?

The **Starlink Local Plan** now supports both fixed and motion use, meaning you no longer need a separate Mobile Plan for vehicles, allowing for seamless internet access on the go!

Scan and contact us for more info

Order your Starlink Kit now

## What are the drawbacks of not using AutoBoost for data management?

Without the AutoBoost, exceeding your allocated priority data will incur charges of \$1/GB for local plans. Choose AutoBoost for seamless data management and automatic upgrades when you run out of priority data.

# ENERSTAR PAYWALL

## ? What is EnerStar Paywall Management?

Elevate your internet access management with the Enerstar Solutions Paywall Option. This innovative feature empowers companies to regulate user access to online resources while effectively monetizing their internet services. With the Paywall Option, you gain complete control over internet access, enabling you to manipulate speed and bandwidth, tailor services to meet user needs, and maximize revenue potential.

For pricing, contact your sales person or dial +1-833-637-7827 or 83-Enerstar

### Paywall Features:

- **User Access Control:** Customize access levels, allowing you to restrict or grant internet usage based on subscription tiers.
- **Revenue Sharing:** A revenue share model that enables flexible profit distribution for both parties.
- **Equipment Provisioning:** We provide Starlink kits and handle the installation at no charge. The bus company only pays for the travel cost to the installation location, the Starlink priority data, Enerstar's advanced support fee, and an auto boost option.
- **Starlink Priority Data:** Gain access to a high-speed priority data plan for dependable internet connectivity.
- **Payment Options:** Implement a variety of payment methods, including flexible options like vouchers, pay-per-use, and user subscriptions.
- **Real-Time Usage Monitoring:** Track user activity and bandwidth consumption to optimize service delivery and customer satisfaction.
- **Customizable Splash Page:** Tailor the splash page to reflect your brand identity, including personalized messages and visuals that resonate with your customers.

## How can EnerStarlink's client portal enhance my management and support experience?

With EnerStarlink's client portal, you can seamlessly manage multiple sites, monitor your device's usage, and access critical account information all in one convenient location. Our advanced support services ensure that you have the tools and resources necessary to address any issues that may arise, enhancing your overall experience with Enerstar.

### Portal Features:

- Turn kits on and off
- Change data plans or activate AutoBoost
- Set up data usage alerts
- Enable obstruction (telemetry) alerts
- Configure outage alerts (site down notifications)
- View your public IP address
- Enable or disable the public IP address
