### Our Commitment to Connectivity

At EnerStar Solutions, we specialize in integrating Starlink technology into various applications. Our focus is on embedding Starlink broadband into mobile units, vehicles, and custom infrastructures, ensuring that it's operational-ready for a diverse range of clients, including government agencies and commercial enterprises.

We take pride in our innovative approach, which not only helps bridge the digital divide but also supports critical sectors like emergency response and fleet management. Our expertise in systems integration ensures that our clients can access high-speed internet reliably, even in the most challenging environments.

# 8,000+

## Professional Starlink installations across North America

**?** At EnerStar Solutions, we are excited to share that we have successfully completed over 8,000 professional Starlink installations across North America. This milestone reflects our commitment to delivering reliable internet connectivity to our customers. To support this achievement, we now have more than 500 Starlink-certified installation technicians on our team. With their expertise, we continue to enhance our services, ensuring that more communities can experience the benefits of cutting-edge satellite technology.

# STARLINK FUSION

EnerStar Solutions is proud to introduce Starlink Fusion, a cutting-edge internet solution designed for modern enterprises. Starlink Fusion enhances connectivity by bonding multiple Starlink connections, delivering higher speeds and greater data flow. Whether you need high-speed internet for your office, man camp, industrial worksite, disaster response solutions, or temporary on-demand networks, Starlink Fusion ensures the reliability and performance you need to stay connected.

## Key Features

- High Data Capacity: Each banked unit provides 10GB of priority data or more.

## Exceptional Speeds:

- Fusion 4: 380-450 Mbps download, 80-100 Mbps upload\*
- Fusion 3: 300-380 Mbps download, 60-80 Mbps upload\*
- Fusion 2: 220-330 Mbps download, up to 40 Mbps upload\*

**Comprehensive Management:** Fully managed network with client paywall options and a Multi-LAN Gateway for uninterrupted service.

**Versatile Solutions:** Mobile pop-up options for disaster recovery and custom pricing based on site-specific needs.

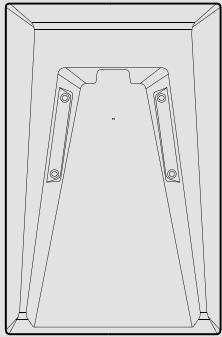

\*Speeds may vary based on conditions.
