Strengthening Partnerships: EnerStar's Visit to Starlink Headquarters

EnerStar was honored to have members of our executive team; Len, Richard, Jim and Rob (*left to right*), invited to Washington this week by the Starlink team.

A sincere thank you to Jason, Jack, and everyone at Starlink for the warm welcome, insightful discussions, and the opportunity to tour their impressive facilities. The visit offered valuable perspective on the innovation and dedication driving Starlink's mission to connect communities worldwide.

We're proud to partner with such a forward-thinking organization and to serve as an Authorized Starlink Reseller, helping deliver reliable, high-speed connectivity to customers and communities across North America.

EnerStarLink Highlights: Connecting Communities and Industries

AnchorNets 2025 - Washington, D.C.

EnerStarLink proudly participated in the #AnchorNets2025 event organized by the SHLB Coalition. This gathering brought together broadband leaders from across the nation to discuss strategies for enhancing connectivity and empowering communities. The event was a fantastic opportunity to share insights and collaborate on initiatives that drive digital inclusion.

Permian Basin International Oil Show - Texas

This year marked EnerStarLink's debut at the Permian Basin International Oil Show (PBIOS). We had the pleasure of engaging with numerous industry professionals and organizations, fostering valuable connections and exploring innovative solutions in the oil and gas sector. The insights gained from this event will help us further our mission in supporting industry advancements.

Starlink Milestone: A New Era in Global Connectivity

Starlink Speeds Surge: A 50% Increase in Performance

Surge in Starlink Speeds

Starlink's median download speeds have increased by an impressive 50% this year, now reaching between 210 and 220 Mbps, up from 160 Mbps, with upload speeds climbing to 30 Mbps from 20 Mbps. These enhancements position Starlink as a competitive alternative to traditional fiber internet, significantly improving connectivity for both rural and urban areas.
